Tell me about vAI for Microsoft Teams

vAI 16:26

vAI for Microsoft Teams is the secure Artificial Intelligence (AI) tool designed to keep privacy conscious organisations agile and at the forefront of technological change.

vAI is built on Microsoft Azure and accessible through your Teams app. With vAI, you can ensure AI not only boosts productivity but does so in the safest environment. It's time to embrace the change.

Secure, private, compliant AI

vAI is built on Microsoft Azure

Azure is the leading platform in security and compliance. With vAI, your critical information stays within your Azure domain for intelligent data management. We champion the sanctity of your data, ensuring your AI applications uphold the highest security standards possible.

vAI is accessible through Microsoft Teams

Integrating vAI into your existing Teams environment streamlines the key applications in your organisation. This further promotes security as fewer applications mean fewer potential vulnerabilities, greater access control and enhanced user awareness.

**UNCOMPROMISED
DATA SECURITY**

**AI ENHANCED
PRODUCTIVITY**

Why vAI

ENHANCED PRODUCTIVITY

vAI enables organisations to automate tasks, improve efficiency and drive innovation. This makes it the ideal tool to improve collaboration and communication. Divert valuable resources to strategic growth-enabling projects by freeing your team from routine tasks with vAI.

EXPERIENCED PARTNER

Viatel Technology Group is more than a service partner; we are experts in digital transformation. Our proven success in helping organisations to optimise business processes using the power of technology makes us the perfect partner to help you navigate the dynamic AI landscape.

SEAMLESS INTEGRATION

vAI deployment involves zero downtime causing minimal business disruption. Together, we'll ensure the transition is smooth, secure and offers substantial value for your business growth.

FUTUREPROOF

Uncover your competitive edge. By adopting AI tools, you create the perfect environment for business growth. As AI fuels your business expansion, vAI grows with you, as a fully scalable solution.

Our process: vAI in five

AI technology moves at pace and so do we. Your organisation can be operational with a fully tested vAI solution mapped to your requirements in just five days.

DAY 1: COLLABORATIVE AI WORKSHOP

This intensive session, facilitated by the Viatel AI Team and expert business analysts, helps organisations to comprehensively map requirements to ensure they optimise vAI for their business needs.

DAY 2: DEVELOPER BRIEFING

Workshop findings and deliverables are communicated to the technical team. Development team are granted access to customer systems.

DAY 3-4: DEVELOPMENT AND TESTING

vAI software is customised to meet customer requirements. Thorough testing is conducted prior to handover.

DAY 5: GO LIVE

vAI is integrated and ready to use in your organisation's Teams channel. Training options are available to ensure your team gets the most from vAI's considerable potential.
