“ We consider Viatel Technology Group to be one of our main partners in our business. They understand our business and our risk profiles. We have completed quite a number of successful projects with them down the years. Being due a hardware refresh, we went through our due diligence of whether we would do an on-prem refresh or take the leap of faith and move to Microsoft Azure.

Although we were apprehensive at first, those fears were totally unfounded. The Viatel team were with us every step of the way and the go-live date was probably the smoothest thing I have ever witnessed in terms of IT. From a resilience point of view, Microsoft Azure is an idyllic solution. It also gives us the flexibility, adaptability and also all of the security elements that we need. It's the complete package. ”

Louis Fay, CEO
 St. Francis Credit Union

“ Heritage Credit Union migrated to the Viatel SD-WAN solution and we are extremely pleased with the service provided in terms of network reliability, a well-managed and uneventful migration and easy access to support personnel. ”

Al McCauley, Former CEO
 Heritage Credit Union

Platinum Standard
