Viatel Technology Group's Cybersecurity Approach

Cybersecurity is more than just a service; it's a strategic imperative. At Viatel Technology Group, cyber resilience is at the core of every solution we deliver. We're committed to safeguarding your digital assets, from operational resilience to long-term strategic planning.

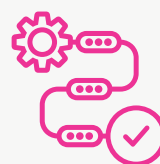

Viatel Technology Group's approach encompasses understanding your security posture, protecting all people, endpoints and systems, hypervigilance when it comes to potential breaches and how to adapt and recover in the event that it has occurred.

A culture of cyber resilience within your organisation is critical. Empowered by informed and vigilant employees, it is the cornerstone of effective protection against cyber threats.

Understand your security posture

Make a cyber resilience plan.

Protect everything

Keep all your mission-critical assets safe.

Assume Breach

See it. Stop it.

Recover

Get back to business as quickly as possible.

Viatel Cybersecurity Solutions Portfolio

UNDERSTAND YOUR SECURITY POSTURE

Cybersecurity Consultancy

Viatel's team of cybersecurity experts work with you to create a security plan that is tailored to your organisational needs and potential threats. We help you identify, prevent, and mitigate cyber threats, keeping your data and operations safe.

KEY BENEFITS:

Expert Guidance and Best Practice

Viatel's cybersecurity consultants bring extensive knowledge and experience to the table. They can assess your organisation's current security posture, identify vulnerabilities, and recommend best practices aligned with industry standards. This expert guidance helps you make informed decisions and implement robust security measures.

Tailored Cybersecurity Strategy

A one-size-fits-all approach to cybersecurity is ineffective. Viatel's consultants work closely with you to understand your specific needs and develop a customised cybersecurity strategy. This ensures that your security measures are relevant, scalable, and effectively protect your organisation's unique assets.

Scalable Solutions for Growth

As your business evolves, so do your cybersecurity needs. Viatel's consultants can help you design a scalable security framework that can adapt to your changing requirements. This ensures that your security posture remains strong and protects your organisation as it grows and transforms.

vCISO as a Service

Empower your organisation with expert cybersecurity leadership without the full-time commitment.

KEY BENEFITS:

Strategic Guidance, On-Demand

Gain access to seasoned CISO expertise to steer your cybersecurity strategy, ensuring alignment with industry best practices and regulatory requirements.

Customised Security Solutions

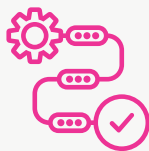

Benefit from tailored cybersecurity programs designed to address your organisation's unique needs, mitigating risks and safeguarding critical assets.

Proactive Risk Management and Governance

Enjoy continuous monitoring of your cybersecurity landscape, including regular risk assessments and compliance audits, to maintain a strong security posture and demonstrate due diligence.

**PROTECT
EVERYTHING**

Viatel Secure Network (Network Security)

Ensures secure, reliable network infrastructure through Fortinet's firewalls, switches, and access points.

KEY BENEFITS:

Enhanced Network Security Posture

Viatel's expert team provides advanced security solutions to bolster your network's defences, safeguarding your sensitive data from cyber threats.

Proactive Threat Detection and Response

By leveraging cutting-edge technologies and experienced security analysts, Viatel proactively identifies and responds to potential threats, minimising downtime and financial loss.

Scalable and Reliable Network Security

Viatel's flexible solutions adapt to your evolving business needs, ensuring optimal performance and security, regardless of your organisation's size or complexity.

IDEAL FOR:

Customers needing a robust network defence against intrusions and cyberattacks.

End-User, Email, SOC & SIEM

Viatel Secure Email (Email Security)

Protects against phishing, malware, data loss and Business Email Compromise (BEC) with Mimecast's advanced email security tools.

KEY BENEFITS:

Enhanced Email Security

Viatel Secure Email provides robust protection against phishing attacks, malware, and data breaches, safeguarding your organisation's sensitive information.

Improved Business Continuity

By mitigating email-borne threats, Viatel Secure Email helps ensure business continuity and minimises disruptions caused by cyberattacks.

Simplified Email Security Management

Viatel's user-friendly solution streamlines email security management, reducing administrative overhead and enabling efficient protection of your organisation's email infrastructure.

IDEAL FOR:

Companies needing to secure business-critical email communication.

Viatel Cyber Awareness Training

Educates and empowers employees to recognise and avoid cyber threats through KnowBe4's training programs.

KEY BENEFITS:

A Proactive Workforce

Viatel's Cyber Awareness Training empowers employees to become the first line of defence, actively identifying and reporting potential cyber threats.

Reduced Risk of Human Error

By fostering a culture of cybersecurity awareness, Viatel's training minimises the risk of human error-related security breaches.

Enhanced Organisational Security Posture

A well-trained workforce strengthens an organisation's overall security posture, reducing the likelihood of successful cyberattacks.

IDEAL FOR:

Any organisation seeking to build a cyber-aware workforce.

**ASSUME
BREACH****Viatel Managed Security (SIEM/SOC Service)**

24/7 managed security operations, including threat monitoring and response, powered by Barracuda's SOC team.

KEY BENEFITS:**Proactive Threat Detection and Response**

Viatel's Managed Security Service provides round-the-clock monitoring and rapid response to potential threats, minimising downtime and data loss.

**Expert Security Analysts**

Our experienced security analysts, backed by Barracuda's SOC team, leverage advanced technologies to identify and neutralise cyber threats.

**Enhanced Security Posture**

By offloading security operations to Viatel's experts, organisations can focus on their core business while benefiting from a robust and proactive security posture.

IDEAL FOR:

Companies needing around-the-clock security monitoring and incident response.

**Viatel Ransomware Containment
(Anti-Ransomware)**

Protects critical data from ransomware with BullWall's containment technology.

KEY BENEFITS:**Rapid Ransomware Detection and Response**

Viatel's Anti-Ransomware solution swiftly identifies and neutralises ransomware attacks, minimising their impact on your business operations.

**Advanced Threat Protection**

Leveraging cutting-edge technologies, Viatel's solution proactively protects your network from advanced ransomware threats, safeguarding critical data and systems.

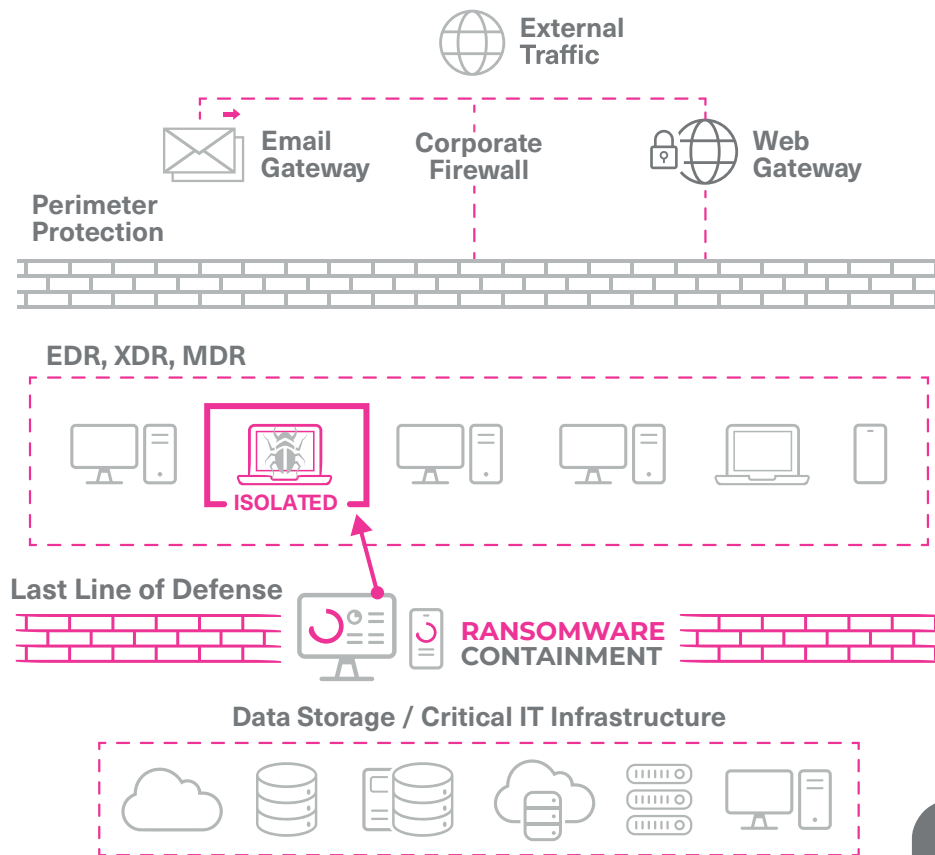

**Business Continuity Assurance**

By preventing and mitigating ransomware attacks, Viatel's Anti-Ransomware service helps ensure business continuity and minimises potential financial losses.

IDEAL FOR:

Companies that handle sensitive or valuable data and want proactive ransomware protection.

Ransomware Containment

Managed Backup

Safeguard your critical data with our robust and reliable backup solutions.

KEY BENEFITS:

Unmatched Data Protection

Benefit from advanced backup and recovery technologies to safeguard your valuable data against potential threats like ransomware, hardware failures, and human error.

Rapid Disaster Recovery

Minimise downtime and business disruption with our swift and efficient disaster recovery processes, ensuring business continuity.

Peace of Mind with Data Security

Rest assured that your data is protected by industry-leading security measures, including encryption and access controls, to prevent unauthorised access and data breaches.
