CARBON REDUCTION STATEMENT

November 2026

Viatel Technology Group's ("**Viatel**") aim is to be carbon neutral by 2050.

Baseline Emissions Footprint

Baseline Year: 2024	
Additional Details relating to the Baseline Emissions calculations.	
Viatel's 2024 baseline figures for Scope 1 and Scope 2 emissions are presented below. Given the greater complexity and challenges associated with measuring Scope 3 emissions, Viatel's baseline year for this category was 2025.	
Baseline year emissions: 2,415 tCO2	
EMISSIONS	**TOTAL (tCO2e)**
Scope 1	**224.6**
Scope 2	**2,190.2**
Scope 3 (Included Sources)	**Not measured in 2024.**
Total Emissions	**2,414.8**

Current Emissions Reporting

Reporting Year: 2025	
EMISSIONS	**TOTAL (tCO2e)**
Scope 1	**226**
Scope 2	**541.90**
Scope 3 (Included Sources)	**442.4 (baseline)**
Total Emissions	**1,210.4**

Emissions Reduction Targets

In order to continue our progress to achieving Net Zero, we have adopted the carbon reduction targets below. We project that carbon emissions will decrease over the next five years to 241.5 tCO2e by 2030. This is a reduction of 90%.

KPIs	Unit	Baseline[1]	Sustainability Performance Targets (SPT, absolute delta compared to baseline)					
		2024	2025	2026	2027	2028	2029	2030
1 Scope 1 & 2 (market-based) greenhouse gas emissions	tCO_2e	2414.8	1207.4 (-50%)	483.0 (-80%)	422.6 (-82.5%)	362.2 (-85%)	301.9 (-87.5%)	241.5 (-90%)

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2024 baseline. The carbon emission reduction achieved by these schemes equate to 1,207 tCO2e, a 50% reduction against the 2024 baseline and the measures will be in effect when performing contracts.

- **100% renewable energy powering operations** - As of May 1 2025, Viatel's asset portfolio, including our datacentres, is powered exclusively by 100% renewable energy sources. As a core element of our connectivity network and data centre services, this transition guarantees that every unit of electricity we use is backed by certified 'Guarantees of Origin'—verifying that our energy comes exclusively from clean, sustainable sources.
- **EcoVadis "Committed" sustainability badge** – Viatel received this international third-party recognition for its sustainability practices, scoring over 70% in Environment and Ethics and over 60% in Labour & Human Rights in its first assessment.
- **Cisco Environmental Sustainability Specialisation** – Part of three Cisco specialisations achieved (including customer experience and integrator), this formal designation recognises Viatel's capability in delivering environmentally sustainable technology and services.
- **Sustainable hardware lifecycle support** – Through its partnership with Cisco, Viatel offers customers programmes for returned used hardware to be responsibly reused and recycled, helping reduce e-waste and support a circular economy

Future carbon reduction initiatives

In the future we hope to implement further measures such as:

- Continue to perform annual carbon footprint assessments, improving Scope 1, 2 & 3 emissions tracking to maintain a clear picture of Viatel's carbon footprint
- Maintain and track progress on a carbon reduction action plan
- Explore the development of an Electric Vehicle (EV) strategy
- Explore the launch of an awareness and education campaign regarding operational and value chain carbon emissions.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans. Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard[1] and uses the appropriate Government emission conversion factors for greenhouse gas company reporting[2].
Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard[3].
This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
